

HYDRAULIC TORQUE WRENCH SYSTEMS

- Capacities from 200 to 80,000Nm (147 to 59,000 ft.lbs)
- From 3/4" to 4 " square drive plus hexagon heads for low profile, limited access operations
- Electric and air pumps for fully automatic control of hydraulic torque wrenches

TORQUE MULTIPLIERS

- Manual, air or electric powered
- Continuous turning electronic tools for torque evenness
- Capacities from 100 to 30,000Nm

BOLT TENSIONERS

- The most accurate method of bolt tightening
- Wide range of standard models from M16 to M100
- Undersea models from M20 to M90
- Bolt tensioning pumps, hoses and couplers available

HYDRAULIC NUTS

- Accurate, permanent fastening devices
- From 20 to 100mm diameter. Load from 165 to 3065 Kn
- Special tensioning pumps, hoses and couplers available

HYDRAULIC DRILLS / IMPACT WRENCHES

- Impact, hammer action and variable torque models
- 1/2", 3/4" and 1" drives
- Full range of wood bits available
